

SERIES 60

Flat Lock

THE SERIES 60 is a flat lock composite metal panel system. It allows for a high level of panel flatness and strength compared to single skin panels. The Series 60 streamlined panel creates a stimulating appearance with unique shadow lines and superior flatness.

ADVANTAGES:

Superior Flatness compared to conventional metal

Superior Strength

Large Profiles

Traditional flat seam metal panel look with deeper reveal

SERIES 60 FLAT LOCK

**METAL
DESIGN
SYSTEMS**

DESIGNED FOR
A PERFECT FIT.

THE SERIES 60 is a flat lock panel system which offers a superior flatness over traditional sheet metal shingles. The horizontal or diamond profiles may utilize coil coated painted aluminum composite, natural metal composites, or patined copper composite. The composite material creates bold shadow lines and prevents oil canning. Series 60 installation is very basic allowing for modifications and performs well in large radius conditions. Our system is maintenance free which achieves the highly sought after, innovative style with high performance.

SERIES 60 System Features

| | |
|-----------------------------|-----------------------------------|
| System | Flat Lock |
| Joint Type/Size | Lap Seam |
| Progressive System | Progressive Installation |
| Underlayment | Tyvek Recommended |
