

SERIES 70

Pressure Equalized Hook & Pin Rainscreen

THE SERIES 70 attachment system allows for numerous possibilities. This innovative and flexible system is well suited for most substrates, especially those with insulation outside of the wall cavity. Multiple materials to choose from; ACM, Plate, Glass, Solar panels. The adaptable attachment system allows architects to easily change materials and dimensions to achieve superior aesthetics without changing the method of attachment or performance.

ADVANTAGES:

- Both progressive & non progressive systems available
- True Rainscreen
- Economical
- Efficient Installation
- Accommodates out bound insulation
- Adjustable to field conditions
- Versatile panel shapes & forms with in the same system
- Ability to combine differing material on the same attachment system
- Works with ACM, Plate, Glass, Solar Panels, specialty materials and other wall cladding systems. Call for your special application or challenge.

SERIES 70 PRESSURE EQUALIZED HOOK & PIN RAINSCREEN

**METAL
DESIGN
SYSTEMS**

DESIGNED FOR
A PERFECT FIT.

THE SERIES 70 is a hook and pin style system with no caulk or silicone and virtually maintenance free. This panel system features a continuous vertical channel with adjustable panel support pins. The panel returns are notched to hook over the support pins. This completed system is very clean and attractive.

SERIES 70 System Features

System	Pressure Equalized Rainscreen
Joint Type/Size	Open Joint - No Caulk
Progressive System	Non-sequential
Underlayment	Air and Water Barrier Recommended
Sheathing Over Studs	5/8" Plywood Preferred
Curved Surfaces	Moderate-Difficult
Independently Tested	ASTM E283, E331, E330, E1233, & AAMA 501, 508
Maintenance Free	Yes
Allow for Thermal Expansion	Yes
Price	Moderate
Weather Sealed System	Passed AAMA 508-07
Ease of Installation	Easy
